ABOUT ME

Consultant / PM + IT background + Pharma experience, with a playful edge and 3+ years in the field

I've helped companies like **Novo Nordisk**, **Maersk**, and **ALK** make better decisions and run leaner operations, as a consultant, coordinator, and occasional firefighter (not literally).

I love road trips, and I see **project management as one big road trip**, keeping things on track, navigating around obstacles, and getting to the destination, all while enjoying the ride.

I think of creative solutions to **optimize processes**, because I like when we **cut down on long meetings**, **reduce human, manual error**, and everyone gets to go home earlier (especially me).

At the same time, I **stay late when needed** to ensure tasks are fully closed, because **finalizing work** gives me a strong dopamine kick.

I believe **empathy** is a cornerstone of **professionalism**; it's not just showing up on time, it's showing up for colleagues as humans. Jeg kan også **forstå dansk**, which helps me communicate smoothly.

I'm a **self-starter** thriving with freedom and autonomy; if you give me an inch, I'll take you the whole mile. I also enjoy **conflict resolution**, **negotiations**, and **diplomacy**, which I practice personally as I live with 21 working professionals at a self-run non-profit co-living.
