ABOUT ME

Project Management | Process & Automation | Business Analysis | Ex-Novo | 3+ years in the field

I've helped companies like **Novo**, **Maersk**, and **ALK** run leaner operations as a **consultant**, **coordinator**, and **occasional firefighter** (not literally).

I love finding **creative ways to cut long meetings** and **reduce manual errors** so everyone gets home earlier. At the same time, I **stay late when needed** because finalizing a task fully gives me a real dopamine kick.

I believe **empathy is core to professionalism**: showing up for colleagues as humans, not just on time.

I see **project management as one big road trip**: navigating unexpected obstacles, keeping an eye on the goal, and (most importantly) actually enjoying the ride.

CV HIGHLIGHTS: 3 THINGS I HAVE ACTUALLY DONE

1. **Cut a manual shipment process from hours to minutes** at Novo Nordisk by **automating** Excel data entry into direct imports and **standardizing** the surrounding **communication**, all **within GMP requirements**. Went in as a 3-month maternity leave cover but got extended past a year.
2. **Managed 90+ international freelancers** including hiring, onboarding, and quality-checking their work **across 3 to 5 concurrent workstreams per week**. No contracts or performance reviews to enforce it; just clear onboarding and daily follow-up.
3. **Turned qualitative & quantitative data into 30–40 slide decks in 3–5 days**, presented directly to senior leadership **for tier 1 clients**, e.g. Maersk, Novo, ALK...
Different industry, different topic, every time, with the deadline as the only constant. **Learned it before ChatGPT existed**, so I learned it the hard way.
